4/32-34 Bunn Street, Pyrmont, Sydney

International Experience

- Worked in Dublin from December 2012 to March 2013 in Betboo headquarters developing a Virtual Football League web application using C#, JavaScript, jQuery and SQL Server.

Work Experience

GDS Service Desk Administrator – Site Minder (Tourism)

April 2017 – June 2017 (3 months)

- Created a jQuery bot to load properties rates and pricing into the Sabre System.
- Support customers inquiries through Sales Force team.

Senior .NET Developer – Envision Tecnologia (Tourism)

May 2015 – August 2016 (1 year and 3 months)

- Created a caching using Couchbase NoSQL Database to store flights, hotels, cars and services search results in a JSON format generated by thousands of customers, providing low-latency, delivering search response near real-time, and better user experience. Decreased search response time by eight fold.
- Created a geolocation feature on the flight search toolbar to select automatically the nearest airport based in the user IP using JavaScript, C# and SQL Server.
- Created a Daily Updater Job responsible for searching for the best price in a range of dates.
- Support to Web Services with third-party systems such as Sabre, Tam, Azul, and Gol.
- Support to features in a Travel Solution System where customers sell airline tickets, issue tickets, book hotels, rent cars, and sell personalized services. Refactored existing code and removed redundancy.

Senior .NET Developer – FCamara (IT Consulting)

January 2015 – April 2015 (3 months)

- Created a Time Sheet System in AngularJS v1.5, RESTful WebAPI (OAuth, OWIN), SQL Server, Entity Framework, Azure, Javascript, Bootstrap, HTML5, CSS3, Kanban, and Visual Studio 2013 Team Foundation Server (TFS).
- Led a team of five developers with key responsibilities to assign tasks and review codes.

Senior .NET Developer - F10 Desenvolvimento / Betboo / Diverso Games (Gambling)

July 2011 – May 2014 (2 years and 11 months)

- Created Live Casino and Games website for the European area using C#, ASP.NET, SQL Server, Entity Framework, Visual Studio 2010 Team Foundation Server (TFS), JQuery, Bootstrap, JavaScript, HTML5, and CSS3.
- Created a Web Services in C# connected to a SQL Server (Stored Procedures, Views, Triggers) database to make available for the third-party gaming provider.
- Created a bot in C# integrated with Yahoo currencies to download automatically international currency conversion rates and store in a SQL Server database.
- Integrated Online Voucher and Super Guillotel payment gateways using C# for customer buy credits and place bets through website.
- Optimized SQL Server Stored Procedures for financial reports reducing three times the response time.
- Merged code into multiple environments via Git.
- Attended meetings to integrate third-party systems with companies from England, Scotland, Latvia and Malta, which were suppliers of online games.

Senior .NET Analyst Developer - Rede de Ensino LFG (Educational)

November 2009 – June 2011 (1 year and 10 months)

- Led a team of three developers with key responsibilities to assign activities and approve projects.
- Created a system of teachers' payment using C#, ASP.NET, SQL Server (Stored Procedures, Views, Triggers), HTML, CSS, JavaScript, JQuery and Agile Methodologies.
- Collected requirements through weekly meetings with business areas and created documentation (Requirements, Use Cases, Class Diagrams).
- Support to administrative systems, created new features, modelled database to new solutions, refactored existing code and optimized Stored Procedures.

.NET Analyst Developer - Freelancer Project (International Workshop FEA-USP)

February 2010 – April 2010 (3 months)

- Developed a web application for a workshop using C#, ASP.NET, SQL Server (database modelling), HTML, and CSS. Integrated the system with VISA payment gateway.

Mid .NET Analyst Developer – iThink (Digital Agency)

June 2008 – October 2009 (1 year and 5 months)

- Maintained large business web projects, for instance Ache Laboratories, Gafisa and Telefonica using SQL Server, JavaScript, C#, HTML and CSS.
- Created Web Services using C# to integrate with Flash, CRM Sales Force and Twitter.

- Built Windows Service applications to monitor folders and send reminder emails using C#.
- Developed a RSS reader plugin using C# and XML to attach in a DotNetNuke web application.

Junior Analyst Developer - Paicon Technologies (IT Consulting)

March 2007 – May 2008 (1 year and 5 months)

- Responsible for visit customer to gather requirements and developed new features according to the requirements for a software of a chemical industry.
- Modelled SQL Server database, developed web and windows applications using C# and deployed on the Window Server.

Internship - Centro de Inovacao Microsoft

June 2005 – March 2007 (1 year and 10 months)

- Participated in the development of web applications using C#, Web Forms, SQL Server, and JavaScript.
- Created project documents' (Class Diagram, DFD, UML, Database Diagram, and Requirements).

Education

USP University of São Paulo – the most important public university in Brazil.

Bachelor's degree honours, Bachelor of Information Systems 2011 - 2015

Independent Coursework

MongoDB, Inc.

- M101N: MongoDB for .NET Developers – Certified <http://goo.gl/B7Eptq>.

Microsoft Training

- Programming C# using Microsoft .NET.

International Society of Neuro-Semantics

- Coaching Genius.

Technical Skills

.NET – ASP.NET MVC, WebAPI, WCF, Web Forms, Web Services, Entity Framework, LINQ, Web Services, Azure, IIS.

JavaScript – Underscore.js, Angular.js (v 1.x), jQuery, Node, Express.

HTML/CSS – HTML5, CSS3, Bootstrap Framework.

Database – SQL Server, Transact-SQL, Redis, Couchbase, MongoDB, MySQL.

Other – Git, TFS, Subversion (SVN), JetBrains dotTrace, Scrum, Agile, Kanban, Design Patterns, Application Lifecycle Management (ALM), OAuth, XML, JSON, MER, UML, SCRUM, Software Architecture.
